

FIU Health Care Network presents The Lunch and Learn Lecture Series

Raul I. Tano, MD, FAAFP has dedicated his professional career to promoting the core values of being a physician and primary care provider with an emphasis on preventive care.

Since completing his Residency in Family Practice at Jackson Memorial Hospital/University of Miami, he has been involved in teaching medical students and residents, and has worked with several organizations with an emphasis in teaching the complexities of health care to the community. In addition to being board certified in Family Medicine and a Fellow in the Academy of Family Physicians, Dr. Tano's areas of interest include preventive medicine, sleep medicine, and travel medicine.

A Clinical Assistant Professor at the FIU Herbert Wertheim College of Medicine, Dr. Tano has been in private practice recently for over twenty years, and recently moved from Mercy Hospital to bring his expertise to FIU Health Faculty Group Practice. Dr. Tano's goal at FIU is to teach what it entails to be a physician in these modern times and to promote his philosophy of treating the patient and not the illness itself.

Keeping Your Cool: How to Avoid Heat-Related Illnesses

Raul I. Tano, MD, FAAFP

Wednesday, August 15, 2012

12:00 – 1:00 p.m.

AHC2 160, Modesto Maidique Campus

Exposure to extreme heat and humidity — a year-round possibility in South Florida, but especially during the summer months — can result in heat-related illnesses such as heat stroke and exhaustion, both of which have symptoms that mimic and are often mistaken for other dangerous health conditions such as a heart attack. Join us as Dr. Tano discuss heat-related emergencies, including ways to recognize and treat heat-related illness and injuries. He will also provide tips on how to “keep your cool”. Bring your lunch and attend this informal group session.
